PROFILE

Highly specialized Software Developer always at the forefront of cutting-edge technologies. I'm currently working on highly scalable and maintainable end-to-end solutions using Nodejs, React, Typescript.

Throughout my career, I have worked on diverse projects including Fintech, interactive entertainment platforms, and tourism services. From small to large-scale projects, I have experience in developing solutions from scratch that can serve a high volume of users.

In addition to my technical expertise, I consider myself a team player who values communication and collaboration.

WORK EXPERIENCE

Percapita   **New York, USA (Remote)**
Frontend Developer   *August 2022 – Present*

Project: Fintech application and main marketing website.

- Improved the development time by 30% by creating a modular and reusable React & TypeScript frontend components library.
- Successfully implemented microservices architecture with the migration and integration of backend legacy.
- Enhanced the application performance and rendering time in 10x by implementing server-side rendering with React and Nextjs.
- Optimized existing codebase by fixing critical bugs using Typescript and testing with Jest in order to ensure code quality.
- Deployed highly scalable Nodejs services using Docker and orchestration with Kubernetes, enabling troubleshooting during the process.

Techstack: React 18, Nodejs, Next.js, Typescript, React Hooks
Additional skills: Microsoft Azure, Jira, Figma.

Tequila Tech   **Connecticut, USA (Remote)**
Web Developer   *December 2022 – Present*

Project: Marketing Agency
In this company I built and maintained websites for their clients, being a local MArketing agency in cozumel Mexico allowed me to have direct in person contact with the clients to understand their request and to work hand to hand their desired website

- Designed and developed Custom html emails, Landing pages, React applications. this allowed an increase of 25% of new clients due to new services in the company
- Worked with in house designers who used Figma & Canva to deliver design to developer teams, at the same time I helped designers to guide them to understand Web Best Practices for their designs to prioritize relevance
- Constantly review code for better SEO and faster loading to maintain customer happiness and ensure business growth

Techstack: React, Redux, Node.js, Express.js, Next.js, MongoDB.
Additional skills: Postman, Git, Netlify, Vercel.

ADDITIONAL & PREVIOUS WORK EXPERIENCE (SUMMARY)

Scuba Hunt   **Cozumel, MX (On Site)**
Web Developer   *November 2020 – January 2021*

Project: Diving shop website
As the main Web Developer at Scuba Hunt, I took charge of building and maintaining the entire website. Beyond just coding, I worked the site to meet Scuba Hunt's specific needs, ensuring it looked great and worked smoothly.

- Collaborated with in-house designers employing Figma and Canva, facilitating seamless communication between design and development teams.
- Conducted ongoing code reviews to enhance SEO and achieve faster loading times, contributing to increased customer satisfaction
- Developed tailor-made HTML emails, landing pages, and React applications to enhance the overall online experience for diving enthusiasts.

Techstack: JavaScript, CSS, HTML, Bootstrap Css.

Kings Chefs   **Cozumel, MX (On Site)**
Web Developer   *July 2020 – December 2020*

Project: Private Dining Company
As the Web Developer for kings chefs, I crafted and maintained the website, ensuring it met unique needs with a modern and elegant design.

- Applied advanced JavaScript and react components to design and build visually engaging user interfaces on our company website..
- Ensured a seamless user experience across devices by incorporating responsive design principles into our website layout.
- Collaborated effectively with cross-functional teams, contributing to successful project outcomes and meeting tight deadlines.
